- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown
Comments:

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The UAA was conducted in July, 2005, and no WBCR was observed at any of the nine sites evaluated. The stream met the average and maximum depth criteria at the most downstream site (271) and the average depth criterion at the next most downstream site (272). Because sites 271 and 272 are several miles downstream from the other seven sites, the recommends retaining the WBCR designation from site 272 to the mouth, and removing the WBCR designation upstream from site 272.

Committee Recommendation: ☐ Retain Use ☒ Modify Use ☐ Remove Use ☐ Inconclusive
